Client Pitch Deck

helix
bound

# AI is changing the world; Let's make sure it changes yours.

We're entering a new era of work. AI is quickly transforming industries across all sectors.

In this time of change, there is uncertainty, but there is also opportunity.

Don't ask "How will we keep up?" – Instead ask "How will we lead?"

From inspiration to implementation

Helixbound provides End to End solutions

Business Need → AI Roadmap → Prototype → Deployment → Ongoing Support

How we'll work together

Tailored AI Workflows

One-size-fits-all tools are inconsistent, and not always up to the job.

Our tailored AI pipelines and processes are resilient, and can be relied upon.

Cloud/Provider Choice

You aren't locked in with any one AI provider.

Our solutions are modular, so you can choose the providers and models that fit your use case best.

Expertise and Feedback

If it doesn't get adopted, it doesn't deliver. We build with your team in mind.

In our iterative process, feedback from stakeholders and users is incorporated into the result.

Results and Monitoring

Keep tabs on your AI solution using dashboards and notifications.

Using modern data analysis tools, we make sure your solution is in great shape.

Example Use Cases

Automation	Content Intelligence	Assistive AI	Privacy
Document Parsing and OCR	Email Generation	Sprint/Agile Issue creation	Private AI Assistants
Automatic Summarization	Self Writing Documentation	Accessibility Aides	Small/on device AI

Not just AI experts

At Helixbound, our solutions use modern Web Development technology and methodology.

This allows us to smoothly integrate with your existing tech stack and processes.

We excel at technology communication and training, giving your team the knowledge to succeed with AI.
